This instruction is for imputation missing data We are using mice() package to deal with the missing data So we installed the package

```
#install.packages("mice")
library(mice)

We can also draw the data distribution of each column of the data set.

In the figure, the red color indicates the missing values, and the transition colors from black to gray to white indicate the different values, the more transition colors indicate the more scattered data values, and the less transition colors indicate the more concentrated data values.
